

Board of Retirement Regular Meeting

Sacramento County Employees' Retirement System

Agenda Item 7

MEETING DATE: May 20, 2020

SUBJECT: Trading Cost Analysis and Commission Recapture

First Quarter 2020

Deliberation Receive

SUBMITTED FOR: X Consent and Action and File

RECOMMENDATION

Staff recommends the Board receive and file the Quarterly Trading Cost Analysis Reports for the quarter ending March 31, 2020.

PURPOSE

This agenda item complies with SCERS' investment policy statement reporting requirements and contributes to the effective management and oversight of investment activities.

SUMMARY

SCERS utilizes the services of Elkins/McSherry (E/M), a trading cost consultant and wholly owned subsidiary of State Street, to monitor the trading costs of SCERS' public equity and fixed income managers. Elkins/McSherry provides detailed quarterly reports that analyze the various components of trading costs, the amount of principal dollars traded, and the brokers utilized by SCERS' external managers. Key takeaways during the first quarter of 2020 include:

- Trading volumes across equity and fixed income markets were higher during the first quarter as markets experienced considerably higher volatility compared to the prior year, as the impact from the Covid-19 pandemic spread across the globe.
- Trading costs in U.S. equity markets was significantly higher than prior quarters, mostly due to market impact costs relative to the full-day volume-weighted average price (VWAP), especially compared to the E/M universe benchmark.
- International equity trading costs continue to be significantly higher than in U.S. equity markets, though SCERS' international equity managers continue to generate consistently lower trading costs compared to peer group averages.
- Total principal traded in SCERS' U.S. fixed income portfolio was at the highest level in several years, driven higher by trading in mortgages and corporate bonds. Total trading costs, which are measured in basis points and based on a markup or discount (spread) to face value, were marginally higher but still significantly below peer universe benchmarks as measured by Elkins/McSherry.
- SCERS received a rebate of approximately 49% of the commissions generated by the commission recapture program during the first quarter. While the percentage rebate is

May 20, 2020 Page 2 of 7 Agenda Item 7

consistent with prior quarters, the total dollar amount of commission rebates received continues to decline.

DISCUSSION

SCERS engages Elkins / McSherry to track SCERS' equity and fixed income trading activity and to monitor manager trade execution. E/M analyzes a manager's trade activity against like managers across E/M's universe of approximately 1,400 institutional investors.

E/M's trade analysis report will highlight potential manager trading issues and, if they occur over two or more quarters, Staff will discuss compliance with the manager. The E/M trading cost reports will analyze and compare the following:

- 1. Commission costs, trade costs, and any soft dollar amounts.
- 2. Market Impact Cost, an industry performance metric, which measures the difference between a manager's trade price and the market's volume-weighted average price. VWAP is the average security price weighted by the share volume trade that day.
- 3. Total trading costs.

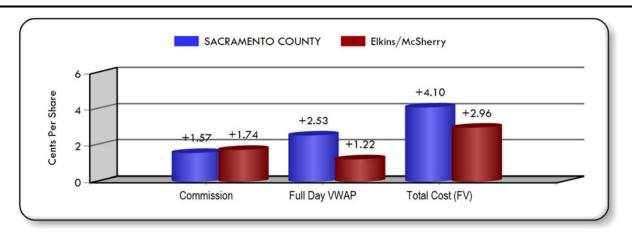

Industry metrics used to measure trade performance include "cps" (cents per share) and "bps" (basis points = 1/100th of one percent).

SCERS TRADE COST SUMMARY

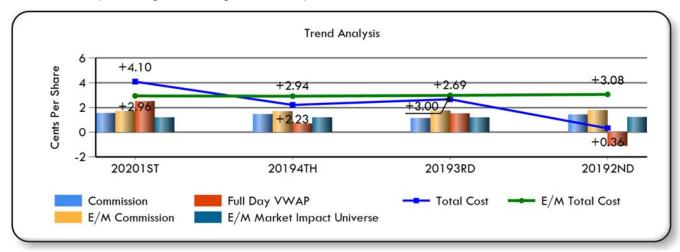

U.S. EQUITY

- SCERS' U.S. equity managers traded 4.1 million shares across the AMEX, NASDAQ, and NYSE exchanges totaling \$198.2 million in principal. SCERS' equity managers generated an E/M E-Score¹ of 0.03 during the quarter, which signifies that costs were slightly higher than the VWAP when considering the volatility of stocks traded.
- SCERS' total trading costs equaled +4.10 cps, which is 1.14 cps higher than the peer group at +2.96 cps, as follows:
 - Commission cost of +1.57 cps versus peer group cost of +1.74 cps
 - ➤ Market impact costs of +2.53 cps versus peer group cost of +1.22 cps
- SCERS' total trading costs during the first quarter were higher than the prior quarter due
 to greater market impact costs, with market impact cost of +2.53 cps compared to +0.71
 cps in the prior quarter. During the quarter, the market experienced heightened volatility
 as markets declined due to the Covid-19 pandemic. Market impact costs were greater
 than the market average for most of SCERS' active managers, with the exception of
 DGHM, which generated significant market savings during the quarter and ranked in the
 top 98% of the E/M universe.

¹ Elkins/McSherry E-Score Rank evaluates transaction cost analysis, including stock specific trading ranges, to provide an assessment of execution quality compared to other market participants in the Elkins/McSherry universe.

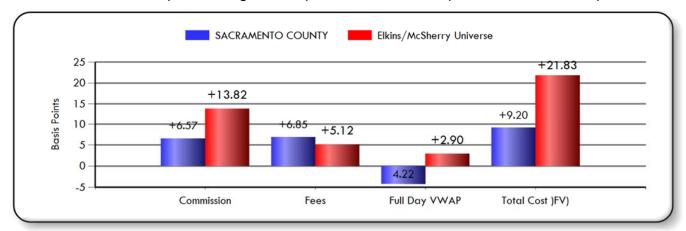

- SCERS' total trading costs were worse than 65% of the peer group.
- SCERS' U.S. Equity managers that experienced unfavorable commission costs compared to the U.S. Equity peer group average cost of +1.74 cps include:
 - ➤ Weatherbie at +3.50 cps
 - ➤ DGHM at +3.06 cps
 - Eagle Capital at +2.70 cps
- As illustrated below, over the past four quarters SCERS' managers have generated slightly lower commission costs than the peer group.
- The U.S. small cap managers (Weatherbie and DGHM) will typically incur additional commission costs in the form of a soft dollar relationship where, in return for conducting trades through a brokerage firm, the manager receives the brokerage firm's research, generally an additional +2.0 cps.
- According to Elkins / McSherry, the average commission for the Bundled (Research Dollars) commission universe is +3.75 cps, which is higher than both of SCERS' U.S. Small Cap managers during the third quarter.

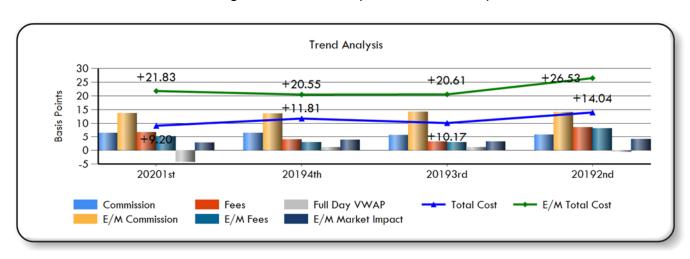

• In the first quarter, SCERS' total trading costs (including market impact) were higher than the E/M universe. This differs from prior quarters, when SCERS' total trading costs have been consistently below the total trading costs of the E/M universe. Over the past four quarters, SCERS' total trading costs have averaged 0.65 cps below the E/M universe.

INTERNATIONAL EQUITY

- SCERS' International Equity managers traded 18.3 million shares totaling \$150.5 million in principal across 28 countries.
- Total trading cost equaled +9.20 bps, which is 12.63 bps lower than the peer group at +21.83 bps, as follows:
 - Commission cost of +6.57 bps versus +13.82 bps
 - Fees (country taxes, tariffs) of +6.85 bps versus +5.12 bps
 - Market impact savings 4.22 bps versus market impact costs of +2.90 bps

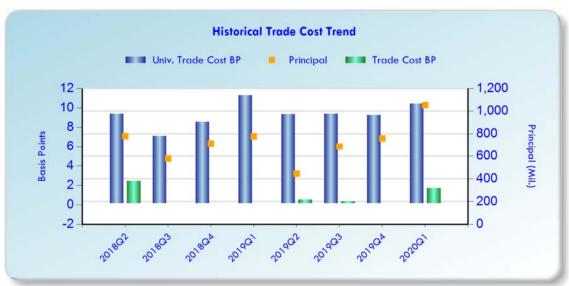

- All of SCERS' International Equity managers analyzed generated commission costs (ranging from +4.57 bps to +7.51 bps), significantly less than the E/M peer group (ranging from +13.09 bps to +14.09 bps). This result is consistent with the previous quarters' lower trade costs versus the peer group, as illustrated below (commission vs. E/M commission).
- SCERS' International Equity managers generated lower market impact cost versus the peer group during the quarter (full day VWAP vs. E/M market impact), with the following exceptions:
 - ➤ Lazard Asset Management at +3.68 bps versus +2.93 bps for their benchmark

 SCERS' total international trading costs have been consistently below the total trading costs of the E/M universe, with the difference averaging 11.08 bps over the past four quarters.

U.S. FIXED INCOME

- SCERS' U.S. Fixed Income managers conducted 691 trades totaling \$1.1 billion in principal, as follows:
 - Governments: 396 trades totaling \$479 million
 - Mortgages: 132 trades totaling \$515 million
 - Corporates: 158 trades totaling \$57 million
 - Municipals: 3 trades totaling \$5 million
- Total trading cost equaled 1.89 bps, which is 8.75 bps lower than the E/M peer group cost of +10.64 bps, as follows:
 - ➤ Governments at +1.45 bps versus +9.73 bps
 - Mortgages at +4.23 bps versus +10.73 bps
 - Corporates at -15.65 bps versus +17.24 bps
 - Municipals at +4.13 bps versus +14.29 bps
- SCERS' Fixed Income managers generated significant cost savings across bond types compared with the benchmark universe trading costs, with the greatest difference in Corporates where SCERS' experienced a cost savings (versus expense) on trading activity.
- As illustrated below, the total trade cost (in basis points) was slightly higher in the first quarter compared to prior quarters' trade costs. SCERS' overall trading volume (in Principal) was also higher than previous quarters as the market experienced higher volatility during the first quarter.

 Comparing SCERS' U.S. Fixed Income Core Plus and Treasury managers trade costs versus their peer group is as follows:

- > TCW (Core Plus) at -0.64 bps versus +10.90 bps
- NeubergerBerman (Treasury) at +2.66 bps versus +10.32 bps

INTERNATIONAL FIXED INCOME

- SCERS is invested with Brandywine Global Fixed Income's commingled fund; therefore, trading activity is not tracked.
- Prudential, one of SCERS' Core Plus Fixed Income managers, is permitted up to a 20% allocation in international bonds or non-U.S. denominated bonds, which is reported as follows:
 - Prudential conducted 157 international trades totaling \$75.9 million in principal as follows:
 - Mortgages: 39 trades totaling \$32 million
 - Governments: 35 trades totaling \$26 million
 - Corporates: 83 trades totaling \$18 million
 - ➤ Total trading cost was -0.14 bps, which was 5.07 bps lower than the E/M peer group cost of +4.93 bps, as follows:
 - Mortgages at -2.04 bps versus +4.94 bps
 - Governments at +7.72 bps versus +4.91 bps
 - Corporates at -8.37 bps versus +4.94 bps
 - Trading costs were in line with the previous quarters' results, as illustrated below, as trading costs have been trending lower over the past year.

May 20, 2020 Page 7 of 7 Agenda Item 7

COMMISSION RECAPTURE

- SCERS' commission recapture program, administered by State Street, instructs investment managers to trade with the program's brokerage partners but only if the trade cost is lower and is the best execution.
- For the first quarter of 2020, SCERS' brokerage partners provided a rebate back to SCERS for approximately 49% of the commissions paid.
 - For the quarter ending March 31, 2020, the commission rebate totaled \$6,924. For comparison, the commission rebate for the quarter ending March 31, 2019 totaled \$17,665.

EXECUTIVE SUMMARY

Elkins/McSherry has been providing trading cost analysis to institutional investors since 1991, serving many of the worlds largest investment managers, pension funds, banks, and broker dealers. Using this vast experience combined with an un-matched collection of global equity market and Universe data, Elkins/McSherry has produced a Trading Cost Analysis on behalf of SACRAMENTO COUNTY. This study evaluates U.S. equity executions from January 1, 2020 to March 31, 2020. The analysis included trading of 4,059,692 shares representing \$198.21 million in principal.

Methodology:

The Elkins/McSherry analysis measures trading efficiency by quantifying the cost of brokerage commission and execution quality versus a Full Day VWAP benchmark for each of the securities traded. These data have been aggregated to summarize results by Buy/Sell, Commissions, Market Impact, Short Term Alpha, Market Cap, Trade Difficulty and Trade Detail. These results are quantified in USD as well as being displayed graphically to highlight the outcomes.

(+) = Cost EXECUTIVE SUMMARY

Elkins/McSherry has been providing trading cost analysis to institutional investors since 1991, serving many of the worlds largest investment managers, pension funds, banks, and broker dealers. Using this vast experience combined with an un-matched collection of global equity market and Universe data, Elkins/McSherry has produced a Trading Cost Analysis on behalf of SACRAMENTO COUNTY. This study evaluates global equity executions from January 1, 2020 to March 31, 2020. The analysis included trading of 18,281,333 shares representing \$150.54 million in principal across 28 countries.

<u>Methodology</u>:

The Elkins/McSherry analysis measures trading efficiency by quantifying the cost of brokerage commission, fees, and execution quality versus an Full Day VWAP benchmark for each of the securities traded. These data have been separated to summarize results, by Buy/Sell, Commissions, Market Impact, Short Term Alpha, Market Cap, Country, Trade Difficulty, and Highest and Lowest Cost Trades. These results are quantified in \$ and Basis Points (BP) as well as being displayed graphically to highlight the outcomes.

Results:

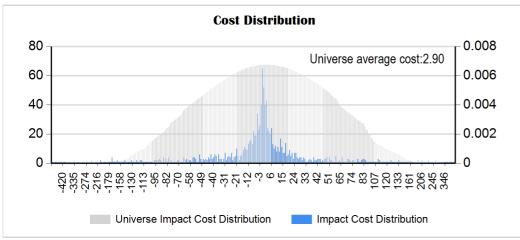

| | BENCHMARK PERFORMANCE | | |
|--|--|--|---------------------|
| Commission | Fees | Full Day VWAP | E - Score |
| Your commission cost was +6.57 bp or \$ +\$98,839 (7.26 bp better than the Elkins/McSherry Universe) | Your fee cost was +6.85 bp or \$ +103,158 (+1.74 bp worse than the Elkins/McSherry Universe) | Your market impact savings was 4.22 bp or \$63,433 (7.11 bp better than the Elkins/McSherry Universe) Your overall trading cost of +9.20 bp was 12.63 bp better than the Elkins/McSherry Universe. Sacramento County trading was higher than the Elkins/McSherry Universe in 8 countries and lower than the Elkins/McSherry Universe in 23 countries. 11 of your brokers had trading cost higher than summary universe of countries (principal weighted) in which they traded. 33 of your brokers had lower trading cost. | • E - Score : -0.05 |

SACRAMENTO COUNTY

US Fixed Income Analysis
Period End March 31, 2020

Sacramento County Period End March 31, 2020 (US Fixed Income Analysis)

Elkins/McSherry has been providing trading cost analyses to institutional investors since 1991. During that time we have produced Post-Trade Cost Analyses for many of the worlds largest investment managers, pension funds, banks, and broker dealers. Using this vast experience combined with an un-matched collection of global fixed income market and Universe data, Elkins/McSherry has recently produced a Trading Cost Analysis on behalf of Sacramento County. This study evaluates U.S. fixed income executions from January 02,2020 to March 31,2020. The analysis included trading of 691 trades in 217 different issues representing \$1,053,957,044 in principal across municipals, mortgages, governments And corporates.

Methodology:

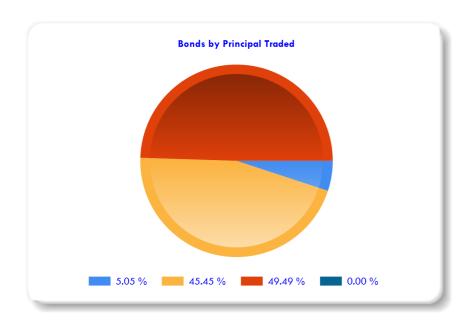

The Elkins/McSherry analysis measures trading efficiency by quantifying the cost of each trade by comparing your executed price to the average price or benchmark price on the day of the trade and to the Elkins/McSherry U.S. Fixed Income Trading Cost Universe. Daily prices are calculated from Market Axess, Tullett Prebon, Bloomberg and Reuters. For comparison purposes, Elkins/McSherry establishes average institutional trading costs quarterly for the most actively traded U.S. treasury, corporates, agencies, mortgages and municipal issues. The "Universe" is the average trading cost incurred by pension funds, investment managers, banks and brokers for Treasuries, Corporates, Agencies, Mortgages and Municipals. Benchmark prices are calculated by using the following methodologies: Government Bonds – Average of six indicative prices received from Tullett Prebon. Municipal Bonds – Average of institutional sized execution prices from MSRB. If actual trade prices are not available the Elkins/McSherry analysis defaults to a fair value price from Reuters or Bloomberg. Corporate Bonds – Average of execution prices where available, from TRACE and Market Axess. If actual trade prices are not available the Elkins/McSherry analysis defaults to a fair value price from Reuters or Bloomberg. Mortgage Bonds – Reuters or Bloomberg fair value prices.

SACRAMENTO COUNTY

Global Fixed Income Analysis
Period End March 31, 2020

Elkins/McSherry has been providing trading cost analyses to institutional investors since 1991. During that time we have produced Post-Trade Cost Analyses for many of the worlds largest investment managers, pension funds, banks, and broker dealers. Using this vast experience combined with an un-matched collection of global fixed income market and Universe data, Elkins/McSherry has recently produced a Trading Cost Analysis on behalf of Sacramento County. This study evaluates global fixed income executions from January 02,2020 to March 31,2020. The analysis included trading of 157 trades in 84 different issues representing \$75,943,024 in principal across mortgages, governments And corporates.

Methodology:

The cost of each trade will be determined by comparing your executed price to the average or benchmark price of the issue on the day of the trade and to the Elkins/McSherry Fixed Income Trading Cost Universe. For comparison purposes, Elkins/McSherry establishes average institutional trading costs quarterly for governments, corporates and agency issues. The Universe is the average trading cost incurred by pension funds, investment managers, banks and brokers.
