

# Board of Retirement Regular Meeting

## Sacramento County Employees' Retirement System

---

### Agenda Item 7

**MEETING DATE:** May 20, 2026

**SUBJECT:** Portfolio Allocation and Rebalancing Report—First Quarter 2026

**SUBMITTED FOR:**  Action  Information

---

#### **RECOMMENDATION**

Receive and file the Portfolio Allocation and Rebalancing Report for the quarter ended March 31, 2026.

#### **PURPOSE**

This item complies with the SCERS Master Investment Policy Statement reporting requirements related to the review of SCERS' current asset allocation as it compares to established targets and ranges, and physical and Overlay Program rebalancing activity that occurred during the quarter.

#### **SUMMARY**

SCERS employs an Overlay Program, which is managed by State Street Investment Management (SSIM), to rebalance the asset allocation to policy targets and also invest available cash, in a manner which replicates SCERS' policy target strategic asset allocation.

Below is a summary of SCERS' asset category and asset class positioning relative to the target allocations as of March 31, 2026 (based on Northern Trust market values, which can differ from those of SCERS' investment consultants). The comparisons to the benchmark allocations below, and throughout the memo, are made in two formats: (1) the difference between the actual and target allocation, and (2) the percentage amount of the actual allocation relative to the target allocation.

<u>Asset Category</u>	<u>Asset Class</u>	<u>Current Allocation</u>	<u>Target Allocation</u>	<u>Difference</u>	<u>% Relative to Target</u>
<b>GROWTH*</b>		<b>57.3%</b>	<b>59.0%</b>	<b>-1.7%</b>	<b>97%</b>
	Global Equity	40.1%	39.0%	1.1%	103%
	Private Equity	11.8%	11.0%	0.8%	107%
	Credit	5.4%	9.0%	-3.6%	60%
	Growth Absolute Return	0.03%	0.0%	0.0%	N/A
<b>DIVERSIFYING*</b>		<b>22.8%</b>	<b>25.0%</b>	<b>-2.2%</b>	<b>91%</b>
	Fixed Income	14.3%	16.0%	-1.7%	90%
	Absolute Return	6.6%	7.0%	-0.4%	94%
	Dedicated Cash	1.8%	2.0%	-0.2%	91%
<b>REAL RETURN**</b>		<b>16.7%</b>	<b>16.0%</b>	<b>0.7%</b>	<b>104%</b>
	Real Estate	6.1%	8.0%	-1.9%	76%
	Real Assets	8.6%	7.0%	1.6%	123%
	Liquid Real Return	2.1%	1.0%	1.1%	205%
<b>OTHER CASH/OVERLAY</b>		<b>3.2%</b>	<b>-</b>	<b>-</b>	<b>N/A</b>

\* Growth and Diversifying allocation weights do not include overlay proxy exposures, which are included in the Overlay allocation

\*\* Real Return allocation includes overlay proxy exposures

***During the first quarter of 2026, the following Overlay Program rebalancing occurred:***

- Quarter-end rebalance:
  - Purchased \$136 million in Growth proxy
  - Sold \$34 million in Diversifying proxy
  - Sold \$102 million in Real Return proxy
  - Decreased the cash allocation by \$1 million

***Key current portfolio allocations relative to targets, and physical rebalancing considerations include:***

- **Global Equity** has a 40.1% allocation as of March 31, 2026, down from a 42.6% allocation as of December 31, 2025, and above the 39% target allocation.
  - **Domestic Equity** has a 19.6% allocation as of March 31, 2026, down from the 22.3% allocation as of December 31, 2025. The 19.6% allocation is below the range high of 21%.
  - **International Equity** has a 16.0% allocation as of March 31, 2025, up from the 15.6% allocation as of December 31, 2025. The 16.0% allocation is above the target allocation of 14% and at the top of the range..
  - **Global/Unconstrained** has a 4.6% allocation as of March 31, 2026, slightly down from the 4.7% allocation as of December 31, 2025. The 4.6% allocation is below the 6% target allocation but above the range low of 4%.
  - In January, Staff performed physical rebalancing within the Domestic Equity sub-asset class, selling \$300 million in exposure across four large cap equity mandates, to reduce the overweight while also moving toward the new Global Equity target allocation of 39% and the recently revised sub-asset class targets.
- **Fixed Income** has a 14.3% allocation as of March 31, 2026, in line with the 14.3% allocation as of December 31, 2025. The 14.3% allocation is below the 16% target

allocation, but within range. Staff is evaluating whether physical rebalancing should be considered.

- **Alternative Asset Class** weights vs. target include:
  - **Absolute Return** – 6.6% vs. 7.0% target; within range
  - **Private Equity** – 11.8% vs. 11.0% target; within range
  - **Credit** – 5.4% vs. 9% target; below the 6% lower bound of the Credit asset-class range, which was established when Public and Private Credit were consolidated and the target increased from 7% to 9%
  - **Real Assets** – 8.6% vs. 7.0% target; within range
  - **Real Estate** – 6.1% vs. 8.0% target; within range

**BACKGROUND**

The Overlay Program rebalances the asset allocation to policy targets and minimizes the risk that SCERS falls short of achieving its targeted return due to the asset allocation straying from policy target ranges. The Overlay Program also invests available cash, including: (1) unallocated cash; (2) the cash balances in manager portfolios; and (3) cash held for previously committed to, but un-invested private market investments, in a manner which replicates SCERS’ policy target strategic asset allocation. The Overlay Program does not invest the 2% dedicated cash allocation.

While SCERS’ Overlay Program reduces the need for physical rebalancing, it does not eliminate it, as there are circumstances whereby physical rebalancing would be a better solution compared to the Overlay Program, including when there is a persistently large difference between physical assets and the target allocation.

While physical rebalancing typically costs more to execute compared to the Overlay Program, it remains important to assess whether SCERS’ portfolio is at a point where physical rebalancing warrants greater consideration.

The Overlay Program structure replicates SCERS’ asset category targets (Growth; Diversifying; Real Return), with bands around these targets (see below). The rebalancing methodology that SSIM utilizes is quarterly rebalancing with bands, where rebalancing occurs on a quarterly basis (at the end of a quarter), unless the bands are breached on an intra-quarter basis, in which case rebalancing occurs upon the breach of a band. The Overlay targets and bands shown below were adjusted in the third quarter of 2025 in line with the revised strategic asset allocation.

Asset Category	Minimum Allocation (%)	Target Allocation (%)	Maximum Allocation (%)
Growth	54	59	64
Diversifying	22	25	28
Cash	0	2	3
Real Return	14	16	18

Each asset category has a separate overlay proxy, which contains a mixture of investments that attempt to replicate the objectives and exposures of the asset category and the underlying asset classes within the asset category, in order to minimize tracking error and costs.

---

The underlying components of each asset category overlay proxy are shown within Appendix B of this report.

Because SCERS' Overlay Program rebalances SCERS' total fund, it is important to note that **Tables 1-14** in Appendix A refer only to physical holdings compared to policy targets, and not the exposures provided through the Overlay Program. The exception is Table 10 (Real Return asset category exposure), which includes the SSIM Real Return Strategy within the Liquid Real Return asset class, which is the Overlay proxy for this asset category, and is implemented through physical exposures (commingled funds).

SCERS' investment staff and general investment consultant Cerity (formerly Verus) monitor the asset allocation on a quarterly basis and update the Board if the asset allocation moves outside of policy ranges and conditions warrant physical rebalancing.

## **FULL PORTFOLIO REVIEW**

### ***GROWTH ASSET CATEGORY:***

The Growth asset category is comprised of the Global Equity, Private Equity, and Credit segments of the portfolio. The Growth Absolute Return segment was eliminated from the SAA and is close to being wound down. As outlined in **Table 1 of Appendix A**, the Growth asset category currently has an allocation of 57.3%, which is below the strategic asset allocation's target of 59% but within range, and the allocation is 97% relative to the target allocation. At a more granular level, the Global Equity and Private Equity exposures are above target while the Credit asset class is below target.

The Overlay Program rebalances the Growth asset category to the 59% target allocation by purchasing or selling global equity futures to bring the Global Equity asset class to its target allocation and then adjusts the remainder of the asset category by using a combination of 88% global equity futures and 12% U.S. Treasury futures.

At the end of the quarter, SCERS' overlay manager, SSIM, purchased approximately \$136 million of overlay growth proxy exposure to rebalance the Growth asset category to its target allocation.

### ***Global Equities:***

As outlined in **Table 2**, SCERS' Global Equity asset class, which includes the sub-asset classes of Domestic Equity, International Equity, and Global/Unconstrained Equity, has an actual weighting of 40.1%, which is above SCERS' policy target allocation of 39%, but within range, and the allocation is 103% relative to the target allocation.

At the sub-asset class level, Domestic Equity has an actual allocation of 19.6%, which is above its target allocation of 19% and below the range high of 21% (103% relative to the target). Staff performed physical rebalancing during the quarter by making partial redemptions from four

Domestic Equity managers totaling \$300 million given the overweight to target within the Domestic Equity sub-asset class and the overall Global Equity asset class.

International Equity has an actual allocation of 16.0%, which is above the target allocation of 14% and slightly above the range high of 16% (114% relative to the target).

The Global/Unconstrained segment has a 4.6% allocation, which is below the 6% target allocation but within range (76% relative to target). Funding during October fulfilled the Board approved investment amount of \$250 million for this segment.

SSIM buys and sells a basket of global equity index futures to rebalance the Global Equity asset class toward the policy target allocation.

***Private Equity:***

As outlined in **Table 3**, SCERS' Private Equity allocation of 11.8% remains above the target allocation of 11%, but within range. The allocation is 107% relative to the target allocation.

SSIM utilizes a basket of 88% global equities and 12% U.S. Treasuries to replicate Private Equity, as part of a broader non-public equity proxy within the Growth asset category.

***Credit:***

As outlined in **Table 4**, SCERS' Credit allocation of 5.4% is below the policy target allocation of 9%, and the allocation is 60% relative to the target allocation. As part of the revised strategic asset allocation, the Public Credit and Private Credit asset classes consolidated into a single Credit asset class with a target allocation of 9%, an increase of 2% over the prior consolidated target of 7%.

Illiquid credit valuations are lagged a quarter. With the increase in the overall Credit asset class from 7% to 9%, Cliffwater modeled the forecasted investment pace of the asset class over a 10-year period, and projects that SCERS will reach the new 9% target allocation by 2031.

SSIM utilizes a basket of 88% global equities and 12% U.S. Treasuries to replicate Credit, as part of a broader non-public equity proxy within the Growth asset category.

***Growth Absolute Return:***

As outlined in **Table 5**, SCERS' Growth Absolute Return portfolio has a current allocation of 0.02%. The Growth Absolute Return Portfolio was eliminated from the revised SAA, and SCERS has nearly unwound the exposures within this portfolio. The small remaining allocation is expected to be unwound in 2026.

***DIVERSIFYING ASSET CATEGORY:***

The Diversifying asset category is comprised of the Fixed Income and Absolute Return segments of the portfolio, as well as the dedicated cash allocation. As outlined in **Table 6**, the Diversifying asset category currently has an allocation of 22.8%, which is below the strategic asset allocation's target of 25%, and the allocation is 91% relative to the target allocation.

The Overlay Program rebalances the Diversifying asset category to the target allocation by purchasing or selling U.S. government bond futures.

At the end of the quarter, SCERS' overlay manager, SSIM, sold approximately \$34 million of Diversifying asset category proxy exposure to rebalance the Diversifying asset category to its target allocation.

***Fixed Income:***

As outlined in **Table 7**, SCERS' Fixed Income allocation of 14.3% is below SCERS' policy target allocation of 16%, and the allocation is 90% relative to the target allocation.

The Overlay Program utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy. Staff is evaluating whether physical rebalancing should be considered.

***Absolute Return:***

As outlined in **Table 8**, SCERS' Absolute Return allocation of 6.6% is slightly below the policy target allocation of 7%, and the allocation is 94% relative to the target allocation.

SSIM utilizes a combination of U.S. Treasury futures and Mortgage TBAs to rebalance this segment of the portfolio to its policy target allocation, as part of a broader Diversifying asset category proxy. Staff performed physical rebalancing within the Absolute Return portfolio during the quarter by fully redeeming one fund for a total of \$54 million and adding capital to two funds for a total of \$15 million.

***REAL RETURN ASSET CATEGORY:***

The Real Return asset category is comprised of the Real Estate, Real Assets, and Liquid Real Return segments of the portfolio. As outlined below in **Table 10**, the Real Return asset category currently has an allocation of 16.7%, which is slightly above the strategic asset allocation's target of 16%, and the allocation is 104% relative to the target allocation.

The Overlay Program rebalances the Real Return asset category to the 16% target allocation through the SSIM real return overlay proxy, by purchasing or selling a series of commingled

funds across global REITs, global infrastructure stocks, global natural resource stocks, commodities, U.S. TIPS, and floating rate notes.

At the end of the quarter, SCERS' overlay manager, SSIM, did not make any trades within the Real Return asset category proxy.

***Real Estate:***

As outlined in **Table 11**, SCERS' Real Estate allocation of 6.1% is below the policy target allocation of 8%, and just above the range low. The allocation is 76% relative to the target allocation.

SSIM utilizes a series of listed commingled funds described above to replicate Real Estate, as part of the broader Real Return asset category proxy.

***Real Assets:***

As outlined in **Table 12**, SCERS' Real Assets allocation of 8.6% is above the policy target allocation of 7%, and the allocation is 123% relative to the target allocation. Private real asset valuations are lagged a quarter.

SSIM utilizes a series of listed commingled funds described above to replicate Real Assets, as part of the broader Real Return asset category proxy.

***Liquid Real Return:***

As outlined in **Table 13**, SCERS' Liquid Real Return allocation of 2.1% is above the policy target allocation of 1%, and the allocation is 205% relative to the target allocation. The Liquid Real Return allocation is managed by SSIM, and functions as part strategic mandate and part overlay program proxy for the Real Return asset category. The latter is used to adjust broad Real Return asset category exposures during quarterly overlay rebalancing, and accounts for the slight overweight to the segment.

***CASH:***

As outlined in **Tables 9 and 14**, SCERS' total cash balance is approximately 4.5% as of March 31, 2026, which includes a combination of the 1.8% dedicated cash allocation and 2.7% in other cash. The dedicated cash allocation of 1.8% is 91% relative to the 2% target allocation.

The dedicated cash allocation is intended to close the gap between benefit payments and total contributions in an environment where investment earnings fall short of the targeted assumed rate of return, and also serves as a liquidity buffer.

The 2.7% other cash allocation incorporates the remaining 2025-26 pre-funded annual employer contribution, which was received in July 2025. The other cash allocation is also used to fund

capital calls within the private market segments of the portfolio, and other implementation and rebalancing activity. The other cash allocation is at a higher level as of the end of the quarter as a result of the recently conducted Global Equity physical rebalance, where proceeds are expected to be deployed within the Credit asset class during the latter part of 2026. SCERS' Overlay Program rebalances the portfolio by eliminating cash drag by investing the non-dedicated cash allocation (2.7%) into positions that replicate SCERS' target portfolio.
